Asset Consultant

Frontier Advisors

Recommended investment timeframe

7 years plus

Performance-related fee

0.00%

Return objective

Inflation plus 2.75% per annum, over 7 years

Risk objective

Limit negative annual returns to 1 in 5

Investment Management fee

Direct: 0.15% (cap \$5m)
 Indirect: 0.16%
 Total: 0.31%

Fund Objective

The Moderate model aims to achieve a return of inflation + 2.75% p.a. on a rolling seven-year basis. Since inception in December 2017, a notional investment of \$10,000 would now be worth \$11,219.

Performance Review

	3 Months %	1 Year %	2 Year %
Net return	1.24	12.98	5.74
Objective (CPI + 2.75%)	1.21	4.42	4.53

Net return is shown after investment fees and cost but before administration fees.

Growth of \$10,000

Fund Commentary

The model beat its investment objective for the quarter, as well as for the year.

Since suffering a correction in the last few months of 2018, equity markets (both local and overseas) have rebounded with aplomb. This recovery continued in the last quarter of 2019, with Australian shares clocking up over 23% for 2019 (measured by the ASX 200 index) and overseas shares performing to an even higher extent, returning 26.8% in AUD terms for developed world equities. Fixed interest has also delivered, with returns over 7% for the year. In many respects, the strong returns are understandable. The economy has remained out of recession with unemployment still low; demand for commodities has been resilient; interest rates are at historic lows and expected to stay that way. The political risks (or at least the perception of them), which have formed a backdrop to economic growth in recent years, appear to have receded a little. On the downside, with equity valuations now relatively high, volatility may be higher than in 2019. Markets are likely to react to a greater degree if expected earnings are missed or if governments are perceived to have made policy mis-steps.
