Fund Objective

The Secure model aims to achieve a return of inflation + 1.5% p.a. on a rolling five-year basis. Since inception in July 2012, a notional investment of \$10,000 would now be worth \$13,422.17.

Performance Review

	3 Months %	1 Year %	3 Years %	5 Years %
Net return	0.68	3.13	3.53	4.26
Objective (CPI + 1.5%)	0.73	3.58	3.18	3.41
Standard deviation			1.42	1.88
Standard deviation – ASX 300 index			8.97	10.59

Net return is shown after investment fees and costs but before administration fees. Standard Deviation is a historical measure of the degree to which the portfolio's returns varied over time. The higher the standard deviation, the greater the likelihood that a portfolio's performance will fluctuate and exhibit volatility. Lower standard deviations indicate that the historical returns have been less volatile.

Fund Commentary

The September started off along the same trend as previous quarters, delivering robust returns across most market sectors. However, defensive sectors lagged with (for example) international bonds recording a flat return for the quarter. The highly defensive nature of the Secure portfolio was therefore an impediment to a strong return, but nonetheless an outcome of 0.68% represents a solid premium over pure defensive assets such as cash or a diversified portfolio of government bonds.

The Secure model commenced nearly 5 and a half years ago. In that time, it is pleasing to note that it has never generated negative returns.
